`MortalityLaws` Installation

Marius D. Pascariu

January 10, 2018

The package can be installed from two different sources, `CRAN` or `GitHub`. Most people would choose the first option (see below).

1 Install stable version from `CRAN`

The `MortalityLaws` package can be installed from `CRAN` as follows:

1. Make sure you have the most recent version of R
2. Run the following code in your R console

```
install.packages("MortalityLaws")
```

2 Updating to the latest version of the package

You can track and contribute to the development of `MortalityLaws` at https://github.com/mpascariu/MortalityLaws. To install it:

1. Install the release version of **devtools** from CRAN with

```
install.packages("devtools")
```

2. Make sure you have a working development environment.
   - **Windows**: Install Rtools.
   - **Mac**: Install `Xcode` from the Mac App Store.
   - **Linux**: Install a compiler and various development libraries (details vary across different flavors of Linux).
3. Install the development version of devtools.

```
devtools::install_github("mpascariu/MortalityLaws")
```

Now you are ready to go. Happy modelling!

Check the other vignettes and examples provided in the help pages.
