```
#
#  readJDX is tested with > 100 files before release.
#  However, there are still challenging files out in the wild.
#  If you have trouble importing a file, please file an issue at
#  github.com/bryanhanson/readJDX/issues
```

This vignette is based on `readJDX` version 0.5.36.

The following vignettes are available, in addition to this one:

- *readJDX*, a general introduction and overview.
- The following vignettes will be useful for those wishing to contribute to the development of `readJDX` and those that are troubleshooting files:

    - *Program Flow*, a overview of how `readJDX` functions are organized and the input they require.
    - *MiniDIFDUP_1* is an annotated version of the `MiniDIFDUP` data set.
    - *MiniDIFDUP_2* is an expanded and annotated version of the `MiniDIFDUP` data set.
