Dear Michael,

I should be more sophisticated about these issues, but have never bothered to get up to speed. I suspect the appropriate license is one of the GNU open source things. Anyway, I have always made ms freely available without conditions. I am happy to have you distribute ms with your package, and suggesting a citation is great.

Dear Richard Hudson,  
I would like to ask you under which software license I can use your neutral model generator 'ms'?

I am developing a software package for posterior predictive simulations, and it would be beneficial if I could distribute your program 'ms' (in its original form) alongside my software package.

Thank you, and all the best from Ohio State University,  
Michael Gruenstaeudl
