- 3) Supporting both 'linear-up linear-down' and 'linear-up log-down' method
- 4) Interval(partial) AUCs with 'linear' or 'log' interpolation method
- 5) Produce pdf, rtf, text report files.

Round

Round Half Away from Zero

Description

This is an ordinary rounding function, so called round half away from zero

Usage

```
Round(x, n = 0)
```

Arguments

x	numeric to be rounded
n	indicating decimal digits

Details

The function `round` in R base rounds to the even number, i.e. `round(0.5)` is 0 not 1. If you want rounding 0.5 be 1, you can use this `Round` function. This function is for the consistency with other software like MS-Excel, SAS.

Value

ordinarily rounded value

```
(x = 1:10 - 0.5)
Round(x)
round(x) # compare with the above
```
