Contents

document_lines	2
write_document	2
Index	3

document_lines	<i>Build output lines for a decision report document</i>
----------------	--

Description

Converts a `rapsimng_decide_document` object into a character vector that can be written to disk. A document prefix is written first when present, then each non-NULL section body separated by blank lines.

Usage

```
document_lines(document)
```

Arguments

document	A report object with class <code>rapsimng_decide_document</code> .
----------	--

Value

A character vector containing the ordered document lines.

write_document	<i>Write a decision report document to disk</i>
----------------	---

Description

Serialises a `rapsimng_decide_document` with `document_lines()` and writes the resulting text file to path.

Usage

```
write_document(document, path, overwrite = FALSE)
```

Arguments

document	A report object with class <code>rapsimng_decide_document</code> .
path	A single output file path.
overwrite	Logical scalar indicating whether an existing file may be replaced.

Value

Invisibly returns path.
